DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-22 and 29-38 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-32 in prior U.S. Patent No. 5986191. This is a double patenting rejection.

3. Claims 25-28 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 23 and 24. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

4. Claims 23 -28 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 7-12 in prior U.S. Patent No. 5965831. This is a double patenting rejection.

Claim Rejections - 35 USC § 112

4. Claims 23-28 and 39 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The "gripping portion" and the "ring bearing" critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 39 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matsui in view of Aaroe.

Matsui discloses the use of a tremolo operable with a musical instrument with a base(10) mounted to the body and pivot able about a fulcrum axis, a tremolo arm(15) manually operable to pivot the base and vertical adjustment means for vertically moving the base.

Matsui does not teach the use specific use of a ring bearing assembly.

Aaroe discloses the use of ring bearing assemblies supporting the base (column 2, lines 50-68).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the tremolo as taught by Matsui with the ring bearings as taught by Aaroe in order to provide support.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wolf, May, Baker, and Storey disclose the use of tremolo devices.
